PROFILE

I am a web developer with a background in computer science and experience in creating digital solutions, task automation, and supporting web projects. I focus on building clear, functional, and well-organized products. I have knowledge in API integration and SEO positioning for social networks and websites. I always strive to add value, continuously learn, and work with commitment.

EXPERIENCE:

Ferretería Santa Elena, C.A IT Intern 2024

At Santa Elena Hardware, I supported accounting, sales, administration, and information security. I also implemented credit purchases with Cashea and the parameterization between Profit Plus and BNC bank, in addition to developing a Python application to manage accounts receivable without an internet connection.

NxLabs.io Collaborative Full Stack Developer 2023 - 2025

En NxLabs, colaboré en el desarrollo de aplicaciones web y plataformas de comercio electrónico, integrando sistemas POS y creando automatizaciones en Excel con macros para procesar datos y generar informes dinámicos.

Tiunet-Web, C.A - Full Stack Developer 2025 - 2026

I developed custom web pages and applications, including a car wash system with role control, inventory, and point of sale, as well as landing pages and personalized online stores. I stood out for self-learning, improving existing solutions, and providing practical tools that helped optimize processes and reduce repetitive tasks within the organization.

EDUCATION

L.N Creacion Ocumare 2018 -2022

Bachelor of Science

University Institute of Technology "Tomas Lander" IUTTOL 2022 - 2025

Higher Technician in Computer Science

Code in Place — Stanford University Currently

Advanced Python Programming Course
